

ALZ-NET Imaging Network: Quick Guide for Dementia Practices

Did You Know?

When your imaging facility participates in ALZ-NET, they will be able to upload brain scans for your patients!

Help Us Grow the Imaging Network!

We kindly invite you to help us expand the ALZ-NET Imaging Network by connecting us with the imaging facilities you work with (internally and/or externally).

Here's How it Works:

Identify an imaging facility conducting brain scans for your ALZ-NET patients.

Complete the [Imaging Facility Intake Form](#).
The ALZ-NET Operations Team will take it from there!

The Imaging Facility is activated by the ALZ-NET Operations Team.

Assign the imaging facility for image upload on the ALZ-NET Portal Imaging Log. (Note: You may also complete the upload yourself if available).

Your imaging facility will receive an automated email from the ALZ-NET Portal to upload the images for your patient. No additional action required!
